

Richardson's Falcon Pro Weekend

The Falcon Pro round at Richardson's takes place on the 5th October 2014 and we are really pleased to be hosting this event.

In true 'make it a weekend' style I have arranged a team race for the Saturday (4th) with the availability of overnight accommodation, dinner and breakfast for anyone making a long journey or anyone who just wants to enjoy a chilled weekend of friendly slot-racing.

The Team Race will be for Can-Am bodied 1/24th Production cars with hand-out JK Hawk Retro motors. Each team will be issued with two as part of the entry fee. The JK Hawk Retro has the same spec as the falcon but is comm tied and balanced.

Any two-piece production chassis can be used and all general BSCRA rules apply to the track dimensions, race protocol, servicing, etc.

The bodies must be any commercially available vac'-formed (Lexan,PETG etc) 1/24th scale replica of a real, two-seat, open cockpit Sports Car built and raced before the end of 1969. This includes all the bodies currently used in UKRRA and these are available from most of the distributors of such bodies.

The Race will be 2 hours for teams of 2 or more – equal time for all drivers - and will feature both sponsored prizes and trophies – with a range of sponsors which includes Richardson's and their suppliers, for which thanks!

Overnight accommodation for Friday, Saturday and Sunday will be £35 per person per night including Dinner on the arrival night and breakfast the next morning. You can book any night or combination of nights.

The Saturday race will not start until 2pm with car building and practice from 9am.

Entry fee will be £30 per team and includes two motors.

Please let me know as soon as possible if you are likely to attend one or both of the events in October 2014 – be great to see you here!
